Yorkville Cellars – Our Story in 3 Points

1. All main Bordeaux varietals, from our estate vineyards

Yorkville Cellars is the only known winery that grows all eight of the main grapes of Bordeaux and bottles each as a varietal: **Sauvignon Blanc, Semillon, Cabernet Sauvignon, Merlot, Carmenere, Cabernet Franc, Malbec, and Petit Verdot.** Fine wine shops and restaurants particularly love our lesser-known varietals, which enhance their image by providing unique products to their customers.

2. A highly awarded Californian winery using certified organic grapes

Over the past 15 years Yorkville Cellars has been awarded 600 medals at major international wine competitions. There is increased consumer awareness of responsible farming methods. Since we've been certified organic farmers for 29 years, the brand typically quickly gains placements and good traction at specialist wine shops and chef-run restaurants who want to partner with brands which reflect their market positioning.

3. Mendocino North Coast “bang for the buck” pricing

Along with Napa and Sonoma, Mendocino is part of the super premium North Coast that produces just 12% of Californian wine. Yet our pricing is generally accepted as very competitive for vineyard designated, medal winning wines; especially compared to our neighboring counties.
